As defined in COGCC 100-Series Rules

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

Anadarko (shared tank battery) gave notice when they were boring around their current lines that they discovered historical contamination. Foundation shut-in their well and lines during this testing period. An area was dug up on the well pad at which point the flowlines for multiple wells crossed. Contamination was visible at the area where all the lines meet. It was unsure whether historical contamination occurred from Foundation or Anadarko's lines. Samples were collected shortly thereafter that exceeded BTEX and TPH. Foundation is trying to determine the cause of the contamination and develop a plan to remediate the area.
