Date: Tuesday, October 14, 2014 1:34:00 PM

Jacob,

Because the monitoring wells MW1 through MW11 in the North Excavation are inaccessible for sampling, the COGCC staff have no objections with removing them from the monitoring network based on the no detectable constituents demonstrated in the 7/23 /14 sampling event.

Subject: Karch Blue DD 30-3J GW Report and MW Reduction Proposal: Rem#8110

Bob,

Please review the attached Groundwater Report for the Karch Blue DD 3-3J location. Noble requests a monitoring well reduction, to remove MW01-MW11 in this report.

Please respond if this is an appropriate path to take.

Thanks,

Jacob
