Re: Reuse and Recycling of Waste at Drill Sites

Dear Mr. Lepore:

Omimex Petroleum, Inc. respectfully request permission to use cuttings from drill sites for site access roads. Our plan is as follows:

1. Cuttings will be separated from liquid and dried at well site.
2. Cuttings will be tested to insure they are within the guidelines of Table 910-1 standards. Should cuttings not meet test standard, they will be disposed of at a approved waste management facility,
3. Cuttings will be stored at our Phillips Compressor site where they will be mixed with soil (50/50 and used on lease road in non-crop areas.

Thank you for your consideration.

If you have any questions please call me at 817-804-8902.

Very truly yours,

OMIMEX PETROLEUM, INC.
