Mark and Cheryl-

I apologize for my mistake on this form 6, but I'd like to make a correction. The well I am talking about is the Sekich Farms 19-7L (API: 123-17153). For the Sussex Plug on the form 6 I submitted the wrong info but the wellbore diagram and prog have the correct info. I'd like to change the Sussex plug form 6 info to read "Set 160 sks cmt from 4250' ft to 3850 ft." "Perforate and squeeze at 4250 ft with 160 sx sacks. Leave at least 100 ft in casing 3880' CICR Depth." Could I please get documentation of this Form 6 change?

Again sorry for the mistake on my part, let me know if you have any questions for this change.

Thanks,

Tyler Davis
