### **Waste Management Plan**

Lynch 34-6-18 #1 & Lynch 34-6-18 #2  
SWNW T34N R6W S18 SUL  
La Plata County, Colorado

The following steps will be taken to ensure compliance with Rule 907a:

#### **Drill Cuttings:**

A pitless "closed loop" drilling system will be used. Cuttings will be segregated from drilling fluid and collected into steel containment bin(s). They will then be transferred into steel containers and taken to one of the following commercial disposal facilities:

Industrial Ecosystems, Inc.  
#49 CR 3150  
Aztec, NM 87410  
(505) 632-1782

Envirotech Inc.  
5796 U.S. 64  
Farmington, NM 87401  
(505) 632-0615

Bondad Landfill  
1500 CR 318  
Durango CO 81301  
(970) 247-8295

#### **Drilling Fluids:**

Drilling fluids will be contained onsite in a series of steel tanks. At the conclusion of drilling the fluid will be transported off the location to the following commercial disposal facility or another approved facility:

Basin Disposal Inc.  
200 Montana  
Bloomfield NM 87413  
(505) 632-8936

Frac Flowback:

Frac flowback fluids will be stored onsite in temporary steel frac tanks. Fluids will be transported offsite and be disposed of in the following commercial disposal facility or another approved facility:

Basin Disposal Inc.  
200 Montana  
Bloomfield NM 87413  
(505) 632-8936

Produced Water:

Produced water will be segregated at the separator assembly. It will then be diverted to onsite steel tanks with 110% secondary containment and transported off location to the following commercial disposal facility or another approved facility:

Basin Disposal Inc.  
200 Montana  
Bloomfield NM 87413  
(505) 632-8936
