FRONT RANGE FARMS 37C-14HZ (Form 4 Doc # 400752998)
Township 1 North, Range 68 West
Section 11: NESE
Weld County, Colorado

Dear Mr. Lepore:

Kerr-McGee Oil & Gas Onshore LP ("KMG") respectfully requests the Director to approve an exception to Rule 317.p and only run an LWD gamma ray log in the horizontal section in the above-stated wells on the same multi-well pad. Rule 317.p of the Colorado Oil and Gas Commission's Rules and Regulations requires wells to be logged with a minimum of a resistivity log with gamma ray. The above-named wells are requested to be exempt from this requirement based on agreement to run an alternate logging program in the form of a compensated neutron and gamma ray cased-hole log.

The proposed wells will be logged with an LWD gamma ray log in the horizontal section. The wells will also be cased-hole logged with a cement bond and gamma ray log from the production casing shoe to the surface. If allowance is granted, one of the first wells drilled on the pad will have a compensated neutron and gamma ray cased-hole log run from the kick-off point to the surface.

The Drilling Completion Report (Form 5) submitted for each well will identify (by API #, well name, and well number) which well was logged with the alternate logging program, per this Rule 317.p Exception. Each Form 5 will also indicate that no open hole logs were run and will specify which logs were run as part of the alternate logging program.

Should you have any questions, please contact our office. Thank you for your consideration.

Very truly yours,

Kerr-McGee Oil & Gas Onshore LP
