Re: McIntyre 1-3ST Well
Field Inspection Form - Document # 662300644

Dear Dave,

With regard to the referenced COGCC Field Inspection Form, Santa Fe Natural Resources, Inc. has corrected the items that were outstanding from 2012 as follows:

- 1) we have ensured that the location is free of trash;
- 2) we have installed new signage on the two production tanks, as well as a new location sign;
- 3) we have removed equipment not necessary for production from the location; and
- 4) we have marked the guy line anchors as required.

Please advise if you require anything further to resolve the status of this previous field inspection.

Sincerely,

Sharon Regan-Williams, President
