Re: Operator Request Letter to Rule 318A.n
BAT 4C-9HZ (Doc No. 400742570)
Township 1 North, Range 65 West
Section 9: SESW
Weld County, Colorado

Dear Mr. Lepore:

Kerr-McGee Oil & Gas Onshore LP (KMG) is making application for a drilling permit for the above captioned well. As currently planned, the wellbore(s) of the following well(s) listed in Table 1 will lie within one hundred-fifty (150) feet of the horizontal lateral of the proposed well.

TABLE 1:

Well Name	Well Number	API Number	Appx. Distance from Well(s)	Operator
NO WELLS LIE WITHIN 150' OF LATERAL				

As currently planned, the wellbore(s) of the following well(s) listed in Table 2 will lie within one hundred-fifty (150) feet of the proposed well (but greater than one hundred-fifty (150) feet from the horizontal section of the proposed well).

TABLE 2:

Well Name	Well Number	API Number	Appx. Distance from Well(s)	Operator
BAT	29N1-9HZ	NOT PERMITTED	30	KERR MCGEE OIL & GAS ONSHORE LP
BAT	29N2-9HZ	NOT PERMITTED	60	KERR MCGEE OIL & GAS ONSHORE LP
BAT	29C-9HZ	NOT PERMITTED	90	KERR MCGEE OIL & GAS ONSHORE LP
BAT	3N1-9HZ	NOT PERMITTED	120	KERR MCGEE OIL & GAS ONSHORE LP
BAT	3N2-9HZ	NOT PERMITTED	150	KERR MCGEE OIL & GAS ONSHORE LP

Prior to drilling operations, Operator will perform an anti-collision review of existing offset wells that have the potential of being within close proximity of the proposed well. This anti-collision review may include MWD or gyro surveys and surface locations of the offset wells with included error of uncertainty per survey instrument, and compared against the proposed wellpath with its respective error of uncertainty. If current surveys do not exist for the offset wells, Operator may have gyro surveys conducted to verify bottom hole location. The proposed well will only be drilled if the anti-collision review results indicate that the risk of collision is sufficiently low as defined by the anti-collision plan, with separation factors greater than 1.5, or if the risk of collision has been mitigated through other means including shutting in wells, plugging wells, increased drilling fluid in the event of lost returns or as is appropriate for the specific situation. In the event of an increased risk of collision, that risk will be mitigated to prevent harm to people, the environment or property. For the proposed well, upon conclusion of drilling operations, an as-constructed directional survey will be submitted to the COGCC with the Form 5 Drilling Completion Report.

Rule 318A.n of the COGCC's Rules and Regulations does not allow the lateral of a horizontal well to be drilled within one hundred-fifty (150) feet of other wells unless this requirement is waived by the Operator of the encroached-upon well(s). KMG is the Operator of the encroached-upon well(s).

KMG respectfully requests acceptance of this Operator Request Letter to allow the lateral of the above-referenced well to be drilled within one hundred-fifty (150) feet of the well(s) listed in Table 1 above.

Very truly yours,

Kerr-McGee Oil & Gas Onshore LP
