Re: Operator Request Letter to Rule 318A.n
WILSON RANCH 32N-N27HZ (Doc # 400760541)
Township 4 North, Range 68 West
Section 26: SENE
Weld County, Colorado

Dear Director Lepore:

Kerr-McGee Oil & Gas Onshore LP (KMG) is making application for a drilling permit for the above captioned well. As currently planned, the wellbore(s) of the following well(s) listed in Table 1 will lie within one hundred fifty (150) feet of the horizontal lateral of the proposed well.

TABLE 1:

Well Name	Well Number	API Number	Appx. Distance from Well	Operator
WHISPER ROCK	5N-25HZ	NOT PERMITTED	117	KERR-MCGEE OIL AND GAS ONSHORE LP

As currently planned, the wellbore(s) of the following well(s) listed in Table 2 will lie within one hundred fifty (150) feet of the proposed well (but greater than one hundred fifty (150) feet from the horizontal section of the proposed well).

TABLE 2:

Well Name	Well Number	API Number	Appx. Distance from Well	Operator
WILSON RANCH	5C-27HZ	NOT PERMITTED	15	KERR-MCGEE OIL AND GAS ONSHORE LP
WHISPER ROCK	2C-25HZ	NOT PERMITTED	30	KERR-MCGEE OIL AND GAS ONSHORE LP
WHISPER ROCK	4N-25HZ	NOT PERMITTED	45	KERR-MCGEE OIL AND GAS ONSHORE LP

WILSON RANCH	31N-N27HZ	NOT PERMITTED	75	KERR-MCGEE OIL AND GAS ONSHORE LP
WHISPER ROCK	1C-25HZ	NOT PERMITTED	83	KERR-MCGEE OIL AND GAS ONSHORE LP
WHISPER ROCK	3N-25HZ	NOT PERMITTED	105	KERR-MCGEE OIL AND GAS ONSHORE LP

Prior to drilling operations, Operator will perform an anti-collision review of existing offset wells that have the potential of being within close proximity of the proposed well. This anti-collision review may include MWD or gyro surveys and surface locations of the offset wells with included error of uncertainty per survey instrument, and compared against the proposed wellpath with its respective error of uncertainty. If current surveys do not exist for the offset wells, Operator may have gyro surveys conducted to verify bottom hole location. The proposed well will only be drilled if the anti-collision review results indicate that the risk of collision is sufficiently low as defined by the anti-collision plan, with separation factors greater than 1.5, or if the risk of collision has been mitigated through other means including shutting in wells, plugging wells, increased drilling fluid in the event of lost returns or as is appropriate for the specific situation. In the event of an increased risk of collision, that risk will be mitigated to prevent harm to people, the environment or property. For the proposed well, upon conclusion of drilling operations, an as-constructed directional survey will be submitted to the COGCC with the Form 5 Drilling Completion Report.

Rule 318A.n of the COGCC's Rules and Regulations does not allow the lateral of a horizontal well to be drilled within one hundred fifty (150) feet of other wells unless this requirement is waived by the Operator of the encroached-upon well(s). KMG is the Operator of the encroached-upon well(s).

KMG respectfully requests acceptance of this Operator Request Letter to allow the lateral of the above-referenced well to be drilled within one hundred fifty (150) feet of the well(s) listed in Table 1 above.

Sincerely,

Kerr-McGee Oil & Gas Onshore LP

Ronett Powers
Regulatory Analyst II
