COMMENTS:

The Hiawatha B1 well has been shut in for close to 2 years and a mechanical integrity test was performed in February 2015 and failed. A cement squeeze procdedure was then attempted to repair the casing without success. A decision was made to plug and abandon the well. Due to wildlife stipulations for the raptors (Feb. 1st - July 31st) and uncertainty of the wellbores condition, Chevron believes it is preferable to proceed with the P&A procedure after the wildlife stipulation is over. This will allow time for a possible complex job to be performed. The perforations are currently isolated with a cast iron bridge plug above the perforations.

Operator Comments:

As requested Chevron plans to submit a Form 6 "Intent" P&A for the well by March 1, 2015. The well will remain shut in and secured for the summer. Chevron hereby request approval to proceed with the plug and abandonment for the Hiawatha B1 in the fall of 2015 (August 1st to October 31st).
If you have any questions concerning this well please contact Chevron Production Engineer Jameka Griffin.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
