COMMENTS:

This form is being submitted as the Notification of Completion for a pit closure project in the North Parachute area of operations. Following removal of the pit liner, below-liner soil was visually assessed with no noted staining or discoloration. Five discreet grab samples were collected from the pit bottom and walls, and were analyzed for COGCC Table 910-1 constituents of concern. Based on lab results there is no evidence of a liner failure. See attached summary table and laboratory report. If the information provided here is adequate, please close the remediation project (7528) and pit facility (284001).

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public use: _____
