BP Request for Exception Location
Colorado Oil and Gas Conservation Commission Regulation 603a(2)
Bonifacio Gallegos A 3: 1153 FSL; 2530 FEL Section 2, T33N-R8W N.M.P.M.

Dear Mr. Lepore:

BP America Production Company ("BP") is requesting an exception location be granted to Rule 603a(2) for its proposed Bonifacio Gallegos A 3 well. BP is proposing to drill the Bonifacio Gallegos A 3 well on a pad expansion of the Bonifacio Gallegos A 2 site. Colorado Oil and Gas Conservation Commission ("COGCC") Rule 603.a(2) requires a setback of 150 feet from the wellhead to the closest property line.

The Bonifacio Gallegos A 3 well is staked approximately 118 feet from the property line of Bernice Martinez Trustee, ETALs. This location was chosen to allow for minimal disturbance by placing the well on the current well pad. The closest structure is approximately 1037 feet from the proposed wellhead.

A waiver has been obtained from the Bernice Martinez Trust ETAL and all associated landowners of the encroached upon property line and are attached to this request.

Thank you for considering our request. Should you have any additional questions or concerns, please contact me at 970-335-3828.

Sincerely,

Patricia L. Campbell
BP Regulatory Analyst
