### Check if impacted or threatened by spill/Release (please answer Yes/No to all that apply):

Waters of the State ☐ Residence/Occupied Structure ☐ Livestock ☐ Public Byway ☐ Surface Water Supply Area ☐

As defined in COGCC 100-Series Rules

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

On 3/14/15 at the Razor 33 CPB the pumper manually dumped the 2-stage water knock-out between the compressor and the treater houses and the tank No. 2811 over pressurized and collapsed the thief hatch which allowed approximately 10 to 15 bbls of crude oil to spill from the tank. Approximately 1 bbl ended up outside of the containment and the remainder ended up inside the lined containment. A contractor was called on 3/14/15 to remove impacted stone and liquid. The impacted soil outside of the containment will be collected and treated on-site.
