Dwayne,

RE: Lundgren Facility, Location ID #324342

I was nice talking to you today. Thanks for taking the time to look for documentation concerning the landfarm operation and stockpiles previously existing on the Lundgren pad. That is great but I repeat what I have said previously: Unless documentation exists about confirmation sampling, URSA will need to demonstrate that no impact was left on the pad, specifically in the area covered by the landfarm and stockpiles. Remediation Project #8407 will not be closed and reclamation will not proceed until the COAs are met.

Please submit via e-form 04 a brief sampling plan with a figure indicating the number and location of samples. Enough samples should be taken to characterize appropriately the area covered by the landfarm and stockpiles. Submit the Sampling Plan to the COGCC by **Friday, March 27, 2015**.

This email will be uploaded to the database along with the signed Form 27 supplemental.

Thanks,
Carlos

Carlos,

I have found the documentation that the waste had been managed by previous owner prior to sale. I would like to set up a time to discuss this with you.

Let me know when you have a chance and I can come over.

Thanks,

Dwayne Knudson

Subject: Fwd: Lundgren Centralized E&P Facility NOC (Rem #8407)

Dwayne,

Thanks for submitting the results of the Centralized Facility pit closure, via supplemental Form 27. I have signed it and it will be uploaded to the database. The following COAs must be fulfilled before COGCC staff close the remediation project, REM #8407.

Conditions of Approval (COAs):

1) URSA shall provide confirmation sampling of the formerly existing landfarming operation and stockpile areas. (see attached inspection report, doc #668500248, showing the location of the landfarm operation and stockpiles). Or provide documentation that **'All wastes on-site had been managed by the previous owner as an agreement prior to sale'** as stated in the last sentence of the " Notice of Completion Report."

Note: See attached inspection report and photos.

Hello Carlos,

I have attached the updated Form 27 and NOC to remediation number 8407 for the subject facility. As mentioned in the report, we can provide the manifests/truck tickets for the disposal of soils/water if requested.

Please review this at your convenience and let me know if I can answer any questions.

Regards,

Dwayne
