Dear Mr. Regnier:

Encana Oil & Gas (USA) Inc. ("Encana") staked the above-mentioned wells at surface locations as indicated above and on the attached Well Location Certificates. These wells are being drilled under the rules and regulations of the Colorado Oil and Gas Conservation Commission's ("COGCC") Rule 318A known as the Greater Wattenberg Area Special Well Location, Spacing and Unit Designation Rule. This rule states that all boundary infill wells be drilled from the same surface locations as previously designated in Rule 318A.a.(1) which reads:

"The Greater Wattenberg Area ("GWA") is defined to include those lands from and including Townships 2 South to 7 North and Ranges 61 West to 69 West, 6th P.M. In the GWA, operators may utilize the following described surface drilling locations (GWA windows") to drill, twin, deepen, or recomplete a well (GWA well") and to commingle any or all of the Cretaceous Age formations from the base of the Dakota Formation to the surface:

- (1) A square with sides four hundred (400) feet in length, the center of which is the center of any governmental quarter-quarter section ("400' window");

The Regnier Farms 1A-19H-B268 through 1L-19H-B268 wells were staked at locations northeast of the defined 400' window. As these locations were staked with your consent and approval, Encana respectfully requests your consent to an exception location for the Regnier Farms 1A-19H-B268 through 1L-19H-B268 wells by waiver of the COGCC Rule 318A.a.(1).

If this meets with your approval, please sign and date both originals of this letter, keeping one for your files and returning one to the undersigned.

Dear Mr. Regnier:

Encana Oil & Gas (USA) Inc. ("Encana") staked the above-mentioned wells at surface locations as indicated above and on the attached Well Location Certificates. These wells are being drilled under the rules and regulations of the Colorado Oil and Gas Conservation Commission's (COGCC) Rule 318A known as the Greater Wattenberg Area Special Well Location, Spacing and Unit Designation Rule. Rule 318A.c.(1) states:

"A new surface well location shall be approved in accordance with Commission rules when it is less than fifty (50) feet from an existing surface well location."

Rule 318A.c. states:

"When the operator is requesting a surface well location greater than fifty (50) feet from a well (unless safety or mechanical considerations of the well to be twinned or topographical or surface constraints justify a location greater than fifty (50) feet), the operator shall provide a consent to the exception signed by the surface owner on which the well is proposed to be located in order for the Director to approve the well location administratively."

The Regnier Farms 1A-19H-B268 through 1L-19H-B268 wells were staked over 50' northeast of the existing Regnier Farms 31-19 well located in the same quarter section. As these locations were staked greater than fifty (50) feet from an existing well, Encana respectfully requests your consent to an exception location for the Regnier Farms 1A-19H-B268 through 1L-19H-B268 wells per COGCC Rule 318A.c.

If this meets with your approval please sign and date and return to the undersigned. Thank you.

Respectfully,
Encana Oil & Gas (USA) Inc.
