Dear Ms. Mesta,

Please be aware that the APDs for these wells were abandoned 6/21/2011, and the 2a/permits for cutting management expired on 6/22/14. The Materials Management Plan per the Condition of Approval (COA) for the 2as was required to be submitted with a Form 4 by July 1, 2011. Therefore without a permit and management plan WPX does not have an "oil and gas location" to conduct cuttings management. In short the location can not be used for cuttings management. Considering these facts not conducting final reclamation in a timely manner is not an option. This site must have final reclamation completed by 6/22/15. In order to take advantage of spring precipitation I recommend you commence with the reclamation immediately.

Best regards, Denise

Greetings!

I was asked to forward the attached approved Form 2A (albeit expired) for the cuttings trench on the Federal 399-1-4 pad. We are also working on a materials management plan so that we can use the cuttings trenches. Apparently a plan had been approved previously but more information was wanted by COGCC so that is what we are working on. We do not plan on reclaiming these trenches as we hope to put them in use this year.

Is there any other information you need to address this inspection report? I have the same information for the Federal 399-1-3 pad that I will send shortly.

Thank you very much for your help!
