SPILL/RELEASE REPORT (SUPPLEMENTAL)

This form is to be submitted by the party responsible for the oil and gas spill or release. Any spill or release which may impact waters of the State must be reported as soon as practicable; any spill over 20 bbls must be reported within 24 hours and all spills over five bbls must be reported within ten days. Submit a Site Investigation and Remediation Workplan (Form 27) when requested by the Director.

As defined in COGCC 100-Series Rules

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

On March 18, 2015, a historical release was discovered during plugging and abandonment activities at the Paul Jacobucci Gas Unit 1 production facility. Approximately 850 cubic yards of impacted material have been excavated and transported to the Front Range Regional Landfill located in Erie, Colorado for disposal. Excavation activities at the location are on-going at this time.

How was extent determined?

On March 18, 2015, historical impacts were discovered during abandonment activities at the Jacobucci Paul Gas Unit 1 facility. Approximately 1200 cubic yards of impacted material were removed and transported to Front Range Regional Landfill located in Erie, Colorado for disposal. Ten soil samples were collected from the base and sidewalls of the final extent of the excavation. Soil samples were submitted to Origins Laboratory in Denver, Colorado for analysis of benzene, toluene, ethylbenzene, and total xylenes (BTEX) and total petroleum hydrocarbons - gasoline range organics (TPH-GRO) using USEPA Method 8260B. In addition, samples were analyzed for total petroleum hydrocarbons - diesel range organics (TPH-DRO) and total petroleum hydrocarbons - oil range organics (TPH-ORO) using USEPA Method 8015. Analytical results indicated that constituent concentrations in the soil samples collected from the final extent of the excavation area were below applicable COGCC Table 910-1 standards. Based on the analytical results described herein, Kerr-McGee is requesting a No Further Action (NFA) determination for this location. Soil analytical results are summarized in Table 1 and soil sample locations are illustrated on Figure 2.

CORRECTIVE ACTIONS

#1 Supplemental Report Date: 03/27/2015

Cause of Spill (Check all that apply) Human Error Equipment Failure Historical-Unknown
 Other (specify) _____

Describe Incident & Root Cause (include specific equipment and point of failure)

Historical impacts were discovered beneath the production equipment during abandonment activities. There was no indication that the produced water tank or dump lines were leaking. All associated fittings were tight and working properly.

Describe measures taken to prevent the problem(s) from reoccurring:

The tank battery is being abandoned and will not be rebuilt.

Volume of Soil Excavated (cubic yards): 1200

Disposition of Excavated Soil (attach documentation) Offsite Disposal Onsite Treatment
 Other (specify) _____

Volume of Impacted Ground Water Removed (bbls): 0

Volume of Impacted Surface Water Removed (bbls): 0

REQUEST FOR CLOSURE

Spill/Release Reports should be closed when impacts have been remediated or when further investigation and corrective actions will take place under an approved Form 27.

Basis for Closure: Corrective Actions Completed (documentation attached)
 Work proceeding under an approved Form 27
 Form 27 Remediation Project No: _____

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
