COMMENTS:

This location is intended to be a receiving site for produced water transferred from OXY to Piceance Energy from various OXY locations within the Plateau Valley for completion operations being conducted by Piceance. The water will be transported by water truck from OXY produced water tanks on location via CR330 east to Harrison Creek, then south on Harrison Creek road to one of 2 COGCC approved temporary completion support locations which have 500 bbl "frac" tanks within the pad containment. The water will then be pumped from the water trucks directly into the "frac" tanks. The term of the agreement is for 6-12 months with an option to extend

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____
