RECLAMATION

INTERIM RECLAMATION

☐ Interim Reclamation will commence approximately _____

Per Rule 1003.e.(3) operator shall submit Sundry Notice reporting interim reclamation is complete and site is ready for inspection when vegetation reaches 80% coverage.

☐ Interim reclamation complete, site ready for inspection.

Per Rule 1003.e(3) describe interim reclamation procedure in Comments below or provide as an attachment and attach required location photographs.

Field inspection will be conducted to document Rule 1003.e. compliance

FINAL RECLAMATION

☐ Final Reclamation will commence approximately _____

Per Rule 1004.c.(4) operator shall submit Sundry Notice reporting final reclamation is complete and site is ready for inspection when vegetation reaches 80% coverage.

☐ Final reclamation complete, site ready for inspection. Per Rule 1004.c(4) describe final reclamation procedure in Comments below or provide as an attachment.

Field inspection will be conducted to document Rule 1004.c. compliance

COMMENTS:

Colorado Land #1 Case (Grove Creek Seeps – Location ID: 334537)
REM #5132

OXY USA Inc. (Oxy) is providing the COGCC with remediation status update for 2015 for the above referenced project.

2015 Proposed Activities:

The 2014 quarterly groundwater sample results indicate the continued transient presence of BTEX in the vicinity of monitoring well P15 and up-gradient of monitoring wells P9 and P10. Oxy believes there to be remaining impacted source material from the original Colorado Land #1 pit adjacent to P15. Historical document research on the COGCC database revealed information on a historical tank release that occurred in 1992 by then operator Fuel Resources Development Co. (Fuelco). Aerial imagery review from that time period shows what appears to be a single tank with containment located east-southeast of current monitoring well P9 (see attached Figure 1).

Oxy would like to excavate assessment holes in the vicinity of P15 and P9 to identify and delineate remaining subsurface impacted soil. The anticipated depth should be approximately 12 feet below ground surface, yet just above expected groundwater. The soils will be field screened with a photoionization detector and sampled for the hydrocarbon portion of the COGCC Table 910-1 analytical list. Investigation results and remediation plans will be submitted with a Form 4 update.

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public use: _____
