RECLAMATION

INTERIM RECLAMATION

☐ Interim Reclamation will commence approximately _____

Per Rule 1003.e.(3) operator shall submit Sundry Notice reporting interim reclamation is complete and site is ready for inspection when vegetation reaches 80% coverage.

☐ Interim reclamation complete, site ready for inspection.

Per Rule 1003.e(3) describe interim reclamation procedure in Comments below or provide as an attachment and attach required location photographs.

Field inspection will be conducted to document Rule 1003.e. compliance

FINAL RECLAMATION

☐ Final Reclamation will commence approximately _____

Per Rule 1004.c.(4) operator shall submit Sundry Notice reporting final reclamation is complete and site is ready for inspection when vegetation reaches 80% coverage.

☐ Final reclamation complete, site ready for inspection. Per Rule 1004.c(4) describe final reclamation procedure in Comments below or provide as an attachment.

Field inspection will be conducted to document Rule 1004.c. compliance

COMMENTS:

This form is being submitted to document that an in-situ remediation system had been installed on the D19 595 well pad (335839) in support of remediation project (8114) associated with the closure of pit facility (425839).

After removal of the pit liner, field observations and a series of discrete grab samples were collected to determine if soil impacts were present. After identification of soil impacts, a Form 19 was submitted to document below-liner impacts. The pit was backfilled, and a soil auger drilling rig was used to identify vertical and lateral extent of soil impacts, and install soil vapor extraction (SVE) wells. These wells are now on a monthly operations and maintenance (O&M) schedule with regular data reviews. When data indicates that an endpoint in the remediation has been achieved, a soil auger rig will be scheduled to collect clearance samples for laboratory analysis. Upon receipt of laboratory results demonstrating completion of the remediation project, a Notification of Completion will be submitted to the COGCC to document project completion and request for closure.

Attached is a status report prepared by the environmental contractor responsible for the remediation system installation and collecting O&M readings.

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the

public could reasonably be expected to frequent: _____

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public use: _____
