Dwayne,

I reviewed the lab data attached to the e-form 04 doc #400827817. Results confirm that no impact has been detected in the areas corresponding to the landfarming operation and stockpiles (both on the pad).

I have closed the pit Facility (ID #282224) but need to keep the Centralized Facility (ID #149019) open until the monitoring well associated with it is plugged and abandoned and proper documentation is provided to the COGCC. I have included the following language in both scout cards (pit and Centralized Facility):

*Pit Facility ID #282224 is now CLOSED. The pit has been sampled, remediated and backfilled in accordance with Pit Closure Remediation Project #8407. REM #8407 is closed as well. Centralized Facility ID #149019 will remain open for now until the monitoring well associated with the Centralized Facility is plugged and abandoned in accordance with the State's Engineer Office regulations and documentation is provided. See inspection doc #671000158 conducted 04/07/2015. C Lujan, 04/24/2015.*

Hello Carlos,

I submitted the lab data with the plan and site map this afternoon via Form 4 (doc # 400827817) for the Lundgren A location. I have attached it to this email as well for your convenience.

Please review and let me know if you have any questions or comments.

Regards,

Dwayne
