To: "Fischer - DNR, Alex" <[alex.fischer@state.co.us](mailto:alex.fischer@state.co.us)>

Alex,

We have remedied all of the actionable items from this inspection. It took a little longer that expected due to the heavy rain we have received during the month of May.

David Lee  
Nonsuch Natural Gas, Inc.

Please see the attached Inspection.

Per Rule:

**902. PITS - GENERAL AND SPECIAL RULES**

*c. Any accumulation of oil or condensate in a pit shall be removed within twenty-four (24) hours of discovery. Operators shall use skimming, steam cleaning of exposed liners, or other safe and legal methods as necessary to maintain pits in clean condition and to control hydrocarbon odors. Only de minimis amounts of hydrocarbons may be present unless the pit is specifically permitted for oil or condensate recovery or disposal use. A Form 15, Earthen Pit Report/Permit, may be revoked by the Director and the Director may require that the pit be closed if an operator repeatedly allows more than de minimis amounts of oil or condensate to accumulate in a pit. This requirement is not applicable to properly permitted and properly fenced, lined, and netted skim pits that are designed, constructed, and operated to prevent impacts to wildlife, including migratory birds.*

Thanks  
Alex
