**Form 2A COAs:**

Group	User	Comment	Date
DOW	holstj	This location will be covered under the CDOW/BP WMP. Efforts to avoid, minimize, and mitigate impacts to wildlife resources will be implemented at this location once the WMP is complete.	08/12/2010
OGLA	kubeczkod	Operator must implement best management practices to contain any unintentional release of drilling, completion, or produced fluids.	08/12/2010
OGLA	kubeczkod	Location is in a sensitive area because of proximity to surface water (irrigation ditch and Animas River to east-northeast); therefore, operator must ensure 110 percent secondary containment for any volume of fluids contained at well site during drilling and completion operations; including, but not limited to, construction of a berm or diversion dike, diversion/collection trenches within and/or outside of berms/dikes, site grading, or other comparable measures sufficiently protective of nearby surface water.	08/12/2010
