As defined in COGCC 100-Series Rules

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

On February 13, 2014, a historic release was discovered during the removal of a buried produced water vessel at the Rupert 1, 2, 32-9 (API# 05-123-11064) tank battery. Wells Rupert 1 (API# 05-123-11064), Rupert 32-9 (API# 05-123-17842), and Harley S. Rupert 2 (API# 05-123-16711) produce to this location. The facility was immediately shut in and excavation of impacted soil commenced below the former tank location. Approximately 3,890 cubic yards of impacted material was removed and disposed of at the Front Range Regional Landfill in Erie, Colorado under PDC manifests. Groundwater was encountered during excavation activities at approximately 15 feet below ground surface (bgs). Approximately 250 barrels of groundwater were removed using a vacuum truck and disposed of a licensed water disposal facility. A topographic map of the site is included as Figure 1.
