#### **Description**

1	Drilling/Completion Operations	One of the first wells drilled on the pad will be logged with open-hole Resistivity Log and Gamma Ray Log from TD into the surface casing. All wells on the pad will have a cement bond log with gamma-ray run on production casing (or on intermediate casing if production liner is run) into the surface casing. The Form 5, Completion Report, for each well on the pad will list all logs run and have those logs attached. The Form 5 for a well without open-hole logs shall clearly state "No open-hole logs were run" and shall clearly identify (by API#, well name & number) the well in which open-hole logs were run.

**Operator Comments:**

The directional plan for the HL 11-89-19 #2 has been changed to directional. The HL 11-89-19 #1 (API 05-051-06101-00) and HL 11-89-19 #2 (API 05-051-06137-00) surface locations have switched to accommodate the directional drilling of the wells (the HL 11-89-19 #1 surface location has been changed to the surface location for the HL 11-89-19 #2 and vice versa). A sundry has also been submitted for the HL 11-89-19 #1 to reflect this change. New plats and the directional drilling plan have been attached to this document. The nearest well in the same formation is the Cow Skull 11-89-18 #2 (3212'). Cultural distances have been updated to reflect the surface location change.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
