

Maralex Resources, Inc. Plan to Bring Storage Yard at South Shale Ridge 4-13 into Compliance with COGCC

1. Dispose of all unserviceable equipment and scrap. Keep site free of waste material.
2. Pick up any materials that have migrated off site.
3. Relocate non-lease equipment.
4. On-going control of weeds.
5. Apply to the COGCC for a variance on the 75' minimum distance to operating oil and gas equipment. A safe distance will be maintained in order that the stored equipment will not impede safe access to the operating oil and gas equipment.
6. Implement BMPs for storm water and erosion control.

Item numbers 1, 2, 3 and 4 are in progress. Work is ongoing to bring this site into compliance.
