All,

Red Willow had a 7.3 bbl spill yesterday afternoon. The wellhead packing leaked causing 7.3 bbl of produced water to leak onto the ground. There is a small amount of lube oil mixed with the produced water. The stained gravel will be removed and bugs will be placed on the gravel.

Attached is the spill report, a photograph, and a map of the well location with the location of the spill.

I will be out of the office Monday and Tuesday. If you have any questions please contact Andy Young at [anyoung@rwpc.us](mailto:anyoung@rwpc.us) <mailto:anyoung@rwpc.us> or 970-563-5192.

Thanks and Happy Independence Day!!
