<u>No</u>	<u>BMP/COA Type</u>	<u>Description</u>
1	Drilling/Completion Operations	317.p One of the first wells drilled on the pad will be logged with an open-hole resistivity log with gamma-ray from TD to into the surface casing. All wells on the pad will have a cement bond log with gamma-ray run on the production casing (or intermediate casing if production liner is run). All wells on the pad will have the horizontal portion of the wellbore logged with a measured-while-drilling log with gamma-ray. The Form 5, Completion Report, for each well on the pad will list all logs run and have those logs attached. The Form 5 for a well without open-hole logs shall clearly state "No open-hole logs were run." The Form 5 for a well without open-hole logs shall clearly identify (by API#, well name & number) the well in which open-hole logs were run.

Permit	This well is the sidetrack off the 1st lateral well of a pilot-lateral drilling plan and will be drilled third, therefore the API designation of -02 has been applied to this Form 2. Final Review Completed. No LGD or public comment received.	7/21/2015 9:36:02 AM
Engineer	This APD pertains just to the Coal Bed Methane (CBM) upper lateral portion of the well. Both the surface and production casings were previously assessed and approved in the straight line angled pilot well and have been carried forward with this permit for reference purposes. Initial drilling on all laterals will commence at a depth near the bottom end of the production casing depicted in the pilot well (API ex "00"). The casing in this lateral will be a slotted liner and will not be cemented in place. These laterals will be completed naturally and will not be fracture stimulated. The Statewide HZ Offset Well Policy does not apply to horizontal wells not being fracture stimulated in the pay zone.	6/3/2015 11:01:51 AM
Permit	The following changes were made, per conversation with operator 5/22/15: Amended lease description Selected "YES" under sidetrack dropdown. Made slight correction to longitude value to reflect well location plat.	5/22/2015 9:27:44 AM
Permit	Passed completeness.	5/18/2015 12:37:03 PM
Permit	1.) Missing 317.p BMP. 2.) Proposed Total Measured Depth & Casing depth do not match the Deviated Drilling Plan and Directional Data attachments. Returned to draft.	5/14/2015 10:19:05 AM
