Hi Rebecca,

1. That is correct. Not all of the wells producing to this location are horizontals and therefore don't all need their own separator.
2. I cannot replicate those measurements from the surveyor. I think the nearest property line is to the north and the measurement from the wells should be 335' and the measurement from the facilities should be 620'. Does that match up with what you see?

Thank you,

Ronett

Ronett,

COGCC is in the process of reviewing the Form 2A for Powers 27G-34HZ (doc no 400849737). Please address the following in order help us complete our review.

1. There are 11 separators for equipment, but 12 wells listed between remote locations and on location. Please confirm the number of separators.
2. Please confirm the distances from the well and production facility to the nearest property line.

Let me know if you have any questions.

Thank you,

Rebecca
