Rob,

As I mentioned in my previous discussion and email I wanted to update you with the proposed new pit configuration at the Ward Kincheloe site.

Configuration can be found on the attached figure and the details can be found below. The southern pit hasn't changed except the addition of the liner on the east wall which was already discussed and approved in prior correspondence.

Please update the COGCC records accordingly.

New pit dimensions and capacity - 100' X 42' x 17' = 12,500 BBL

Old Pit dimensions and capacity - 66' x 42' x 17' = 8,350 BBL

Thank you,

Eric Lang, P.G.
