I have reviewed the referenced Form 2A Oil & Gas Location Assessment and have the following comment.

In the Water Resources section you have indicated the estimated depth to groundwater is 100 feet based on the nearest water well (Permit #22726-). A review of that water well permit indicates that 100 feet is the total depth of the well, while the static water level is 48 feet. Therefore, I would like to change the estimated depth to groundwater to 48 feet.

Please respond to this correspondence by October 2, 2015. If you have any questions, please contact me. Thank you.
