Steve,

COGCC has reviewed the Form 27 Site Investigation and Remediation Workplan for the DCP Midstream Eaton Commons release location submitted by DCP Midstream LP on August 7, 2015. The Form 27 has been approved with the following conditions:

1. *Install a ground water monitoring well as near as practicable to the southeast corner of the residence at 301 Hickory Street.*
2. *Install a ground water monitoring well as near to the source of the release as possible or collect ground water samples from one of the EFR wells.*
3. *Air sparge events must be conducted in a manner that allows for recovery of vapor phase hydrocarbons from the subsurface and prevents the potential for impact to nearby residences and utility corridors.*
4. *Measure the pressure/vacuum at monitoring wells near the residences during EFR/AS events.*
5. *Commence additional remediation activity within 90 days of the Form 27 Approval. Submit a Remediation Implementation Report summarizing additional excavation activity, monitoring well installation, and EFR/AS events within 60 days of completion of the additional remediation.*

Remediation Project #9251 has been assigned to this release. Please submit all future correspondence and reports to me via email and reference Remediation Project #9251. Spill tracking #400836478/Spill Facility ID 441725 has been resolved in COGIS.

A copy of the approved Form 27 is attached for your records. Please contact me with any questions regarding this release.

Regards,

Rick Allison, P.G.
