---

Hi Arthur,

I just submitted a sundry for API 05-045-18533 requesting exemption from sampling per Rule 609, and I just noticed an error. I meant to put the number 1 in "Number of Water Sources located..." but I put a zero instead. There is a water source unsuitable for testing because there is no evidence that it was drilled, and it looks to be a monitoring well with no pump. Sorry about the error.
