Josh

Per our discussion, I have closed Pit ID 294276 on the Peters Lease. The Loyd 1-32 well used to produce to this pit and thus the closure data was related to the Loyd 1-32 well file. The closure data can be found in COGCC Remediation Project 5162. Below is a query for all pits in T12N R61W, which returned only the two Peters pits, both of which are now closed. I was also able to update the COGIS data to correct the map so the pits show close to their actual location. You can keep this email as verification of both Peters pits listed below.

Contact me with any more questions.

Rick
