Comments

Buffer zone setback notifications were sent 8/12/15. The BMPs for the Buffer Zone/Exception Zone can be found on the associated Form 2A.

This well was permitted in 2010 but was not drilled. A sundry was filed in 2012 to change the bottom hole from directional to vertical. The current well is the vertical well. Per COGCC request, the APD was abandoned in 2013, but the 2A was kept active through the expiration date. The 2A has expired and is being refiled. The location of the well has moved slightly to meet the current COGCC setback from the utility line

A separate DPW letter has not been sent, the DPW notification is covered by the BP San Juan Basin Colorado Wildlife Mitigation Plan (MWP) dated March 2011.

No BMP/COA Type **Description**

1	Drilling/Completion Operations	317.p BMP One of the first wells drilled on the pad will be logged with an open-hole resistivity log with gamma-ray from TD to into the surface casing. All wells on the pad will have a cement bond log with gamma-ray run on the production casing (or intermediate casing if production liner is run). All wells on the pad will have the horizontal portion of the wellbore logged with a measured-while-drilling log with gamma-ray. The Form 5, Completion Report, for each well on the pad will list all logs run and have those logs attached. The Form 5 for a well without open-hole logs shall clearly state "No open-hole logs were run." The Form 5 for a well without open-hole logs shall clearly identify (by API#, well name & number) the well in which open-hole logs were run.
