COGCC Comments

Comment	User	Date
This well is 210 ft from 4 - mile Creek (Arkansas River). This well produces about 15 bbls/month and is in the Pierre at 2200-2300 ft. In the event of flood the hole would fill with water and the bentonite at 2200-2300 ft would swell and ruin this well. The well would have to be plugged.	duranj	10/12/2015
