Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

Indications of a historical release were discovered by Apex Companies, LLC while investigating an above-ground pipeline condensate release from DCP Midstream, LP. K.P. Kauffman Company was notified of the potential historical release around the Nelson H. Milton F #1 flowline. On September 9, 2015, K.P. Kauffman investigated the area by boring 11 holes surrounding the area of concern. It was discovered that there were multiple borings around the flowline that showed signs of contamination at depths of 1-3 feet. KPK has performed a pressure test on all flowlines in the vicinity, including the flowline that could have caused the historical release.

OPERATOR COMMENTS:

KPK kindly requests closure for this spill. UUpon further investigation once cleanup activities started, offser operator, Andarko Petroleum Corporation, has aknowledged responsibility for the historical release caused by faulty flowlines undetected during line locate activities. Anadarko has filed a Form 19 (400913854) outlining their cleanup procedure.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
