As defined in COGCC 100-Series Rules

Vanguard staff was notified by the surface owner at approximately 5 PM on 8/21/15 that water was observed coming out of the subsurface in our pipeline ROW. Vanguard staff responded immediately and were escorted to the location by the surface owner (Clark Scott). The portion of the ROW is located southwest of our Scott 24B-25-692 facility and west of Divide Creek. We did observe water coming out of the subsurface in three locations within the ROW in a fairly localized area. The pipeline was immediately shut-in and response activities were initiated. Some of the water had left the ROW and migrated down the fill slope a short distance before terminating. There was no surface evidence indicating that the water from the ROW made it to Divide Creek. We removed all the water the the affected portion of the pipeline overnight. Carlos Lujan inspected this location on 8/22/15 and is aware of the remediation plan.
