OGCC Scan,

Please upload the attached with the following information:

Unique Identifier (REM/Spill/NOAV #, etc.): API #067-09956

Document Number (leave blank if one needs to be assigned):

Date received: 11/10/15

Is data entry needed (Y/N): N

Notes: Please upload this e mail to the above identifier as "Rule 608 Initial Test Notification".

Thanks,

Jim Hughes

Subject: Kathy Schuetz - elevated methane

To: "Jim Hughes (jimo.hughes@state.co.us)" <jimo.hughes@state.co.us>

Jim,

Cottonwood Consulting sampled the water well of Kathy Schuetz on 11/2/2015. This sample was taken as part of Rule 608 testing for the Ford H1 that will be drilled early next year. The baseline, predrilling water well sample returned a field methane measurement of 7.38 mg/L. The well is not used for drinking and is only used for watering horses. Cottonwood reported that the well had not recently been maintained. I have directed Cottonwood to retrieve a sample that can be sent for isotopic analysis and a BART test will be run as well. Below is the information on the water well.

Schuetz (Permit #262897 and Rec #9701898) - <1/4 mile from BHL of CBM well

Thank you,
Andy
