## **COMMENTS**

Ursa Operating Company (Ursa) is requesting an exception to the ground water sampling Rule 609 as outlined in COGCC Rule 609.c. (2). due to the conditions listed below:

Water Well Permit # 247946, 247945, 108186, 108765 - After conservations with the landowner, these wells were said to have been drilled but not developed. A field investigation conducted on 09/08/2015 confirmed the existence of the wells, but each well was capped with the cap welded to the riser, deeming them unsuitable for sampling.

Water Well Permit # 228053, 28860/28862 - During the review of the 609 groundwater well determination, these wells were identified as being potential cross gradient and downgradient water wells. A field investigation conducted on 09/08/2015 concluded that these wells do not exist.

Water Well Permit # 63099-F, 63102-F - Conservations with the landowner concluded that these wells do not exist.

A total of two water wells (Water Well Permit # 168756, 169273) were operational and sampled per the requirements outlined in Rule 609.

Ursa is requesting that the two operational water wells be used to fulfill the Rule 609 requirements for the APIs listed below:
