To: Paul Schneider <Paul.Schneider@anadarko.com>

Paul, this project shows a record in the COGCC DB of already having been closed. I believe that closure was done prematurely based on the data you recently submitted. However review of the groundwater data collected subsequent to submission of the form 27 and after the initial closure does indicate the closure at this time is justified as below.

Based on review of information presented it appears that no further action is necessary at this time. However, should future conditions at the site indicate contaminant concentrations in soils exceeding COGCC standards or if ground water is found to be significantly impacted, further investigation and/or remediation activities may be required at the site.
