BP requests approval to change the proposed well design from an "S shaped" well to a "Build and Hold" well. The surface hole location, bottom hole location and surface casing depth will not change. The footages to the top of productive zone have been changed, however it is still within the spacing unit window.

The new Top of Production Footages are: 947 FNL/2618 FWL.

Attached is an updated Drilling Plan and updted Directional data.
