Re: COGCC Inspection Corrective Actions
Adamson 14N-28HZ Well Pad
COGCC Document Number 682400037

Dear Mr. Binschus:

Kerr-McGee Oil and Gas Onshore, LP (Kerr-McGee) submits this response to COGCC Document Number 682400037 regarding the October 29, 2015 inspection at the Adamson 14N-28HZ well pad (COGCC Location ID 442380).

All required action items have been completed as of December 17, 2015 as noted in our responses below.

COGCC Action Item

Remove road base soil pile and straw pile from location by Corrective Action date of November 13, 2015. Refer to photos 13 and 14 in Doc. #682400044.

Kerr-McGee Response

The stockpile of road base on the well pad was within the site perimeter stormwater controls. During the November 12, 2015 site visit, it was discussed between COGCC and Kerr-McGee representatives that Kerr-McGee could use the road base for future production operations. COGCC agreed that the stockpile could be removed once interim reclamation operations commence. To document compliance, Kerr-McGee submitted a Form 42, Document Number 400937126, on November 13, 2015.

COGCC Action Item

Kochia (Kochia sp.) and Russian thistle (Salsola sp.) exist throughout location and must continue to be managed/mowed to prevent large drying thistle debris from spreading.

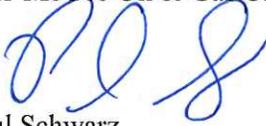

Kerr-McGee Response

The undesirable species, Kochia (Kochia sp.) and Russian thistle (Salsola sp.), located along the perimeter of the well pad were controlled on December 17, 2015 utilizing mechanical means. Mechanical control will aid in preventing encroachment on to adjacent lands.

Feel free to contact me at 970-515-1431 if you have any questions regarding this information.

Sincerely,

Kerr-McGee Oil & Gas Onshore LP
