Jim,

I just learned that Kinder Morgan closed the reserve pit at DC-5 during October of 2007.

Based on the phone conversation you and I had on Thursday last week, Kinder Morgan is currently planning on taking cuttings samples, and meeting with the surface owner to discuss the pit as early as possible.

If you have any additional details concerning the pit closure process, please let me know at your earliest convenience.

Again, thank you for your help.

Best regards,

Andy

Hi Jim,

I got your message yesterday and I'm looking for the specific date for when we closed the pit.

I will let you know asap!

Thank you for your help with this matter.

Best.

Andy

Jim- It is my understanding that Kinder Morgan did not get surface owner approval when the the liner was left in place and the pit back filled and covered, nor where the COAs followed on the Form 15, Pit Permit. Therefore, if Kinder Morgan is not able to provide the appropriate closure documentation from 2007, the pit shall be closed to current standards with the contents of the pit must meeting current 910-1 and the liner removed.

Thanks

Alex
