Katrina,

I have attached anti-collision reports for each well from which the *"distance from completed portion of proposed wellbore to nearest completed portion of offset wellbore permitted or completed in the same formation"* has been determined in a 3D distance.

Please include the following comment on all Form 2s:

The distance from completed portion of proposed wellbore to nearest completed portion of offset wellbore permitted or completed in the same formation has been measured accounting for three dimensions instead of a plan view due to the significant difference in depths which allows the wellbores to be in compliance with the spacing order.

*"distance from proposed wellbore to nearest existing or permitted wellbore belonging to another operator"* are corrected as below:

Razor 25N-2405 1400'  
Razor 25N-2406 1387'  
Razor 25N-2407 1283'  
Razor 25N-2408 1296'  
Razor 25N-2437 1321'  
Razor 25N-2438 1284'  
Razor 25N-2439 1340'  
Razor 25N-2440 1245'

If you have any questions, please call.

Sincerely,  
Michael L. Brown  
307-237-9310
