Katrina,

I have attached anti-collision reports for each well from which the *"distance from completed portion of proposed wellbore to nearest completed portion of offset wellbore permitted or completed in the same formation"* has been determined in a 3D distance.

Please include the following comment on all Form 2s:

The distance from completed portion of proposed wellbore to nearest completed portion of offset wellbore permitted or completed in the same formation has been measured accounting for three dimensions instead of a plan view due to the significant difference in depths which allows the wellbores to be in compliance with the spacing order.

"distance from proposed wellbore to nearest existing or permitted wellbore belonging to another operator" are corrected as below:

Razor 25P-2413 1242'
Razor 25P-2414 1287'
Razor 25P-2415 1279'
Razor 25P-2416 1287'
Razor 25P-2445 1276'
Razor 25P-2446 1212'
Razor 25P-2447 1249'
Razor 25P-2448 1252'

If you have any questions, please call.

Sincerely,

Michael L. Brown
307-237-9310
