**Subject:** State Reportable Release

Good Afternoon,

We had a State Reportable Release at the location listed below due to the threat of impact to waters of the state. It appears that a pressure release valve popped on a separator at the location and resulted in a release of condensate/oil. We estimate the release to be less than 1bbl. A fine mist did extend outside containment and settled on a snow and ice covered manmade pond adjacent to the location. Anadarko will clean up the misted areas and collect a surface water sample to verify whether impacts are present or not. The CDPHE will also be notified of this release. Further information will be provided in a forthcoming Form 19 Initial Release Report. Thank you,

UPRC-63N66W  
Location ID: 336226  
SESE-31-3N-66W
