As defined in COGCC 100-Series Rules

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

On the morning of 1/5/2016, a spill was discovered from the produced water tank at the Critter Creek 5-10H facility. The spill occurred during the night, and was caused by a recycle valve which had frozen. Approximately 160 bbls of produced water were spilled inside secondary containment. All produced water soaked into the ground, and none was recovered. Any remaining produced water was removed from the tank to prevent further leaks, and the tank was taken out of service. Weld County, CO and the surface owner will be notified in accordance with COGCC Rule 906.b.(2) and Rule 906.b.(3), respectively.
