Description

1	Drilling/Completion Operations	One of the first wells drilled on the pad will be logged with open-hole Resistivity Log and Gamma Ray Log from the kick-off point into the surface casing. All wells on the pad will have a cement bond log with gamma-ray run on production casing (or on intermediate casing if production liner is run) into the surface casing. The horizontal portion of every well will be logged with a measured-while-drilling gamma-ray log. The Form 5, Completion Report, for each well on the pad will list all logs run and have those logs attached. The Form 5 for a well without open-hole logs shall clearly state "No open-hole logs were run" and shall clearly identify (by API#, well name & number) the well in which open-hole logs were run.
2	Drilling/Completion Operations	BBC will adhere to the COGCC Policy for Bradenhead Monitoring effective 5/29/12.

Operator Comments:

Please note that, in the Spacing & Formations Tab, the distance from the proposed wellbore to nearest wellbore in the same formation is measured in PLAN view (10 feet) however the 3D distance is actually further than 150 feet therefore no anti-collision BMP's and waivers are attached.

Casing and cement plans have been updated as a result of the LP & BHL footage changes

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
