SPILL/RELEASE REPORT (SUPPLEMENTAL)

This form is to be submitted by the party responsible for the oil and gas spill or release. Any spill or release which may impact waters of the State must be reported as soon as practicable; any spill over 20 bbls must be reported within 24 hours and all spills over five bbls must be reported within ten days. Submit a Site Investigation and Remediation Workplan (Form 27) when requested by the Director.

Check if impacted or threatened by spill/Release (please answer Yes/No to all that apply):

Waters of the State Residence/Occupied Structure Livestock Public Byway Surface Water Supply Area
 As defined in COGCC 100-Series Rules

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

On August 25, 2014, a historical release was discovered during tank battery decommissioning activities at the UPRC 15-6K, 15-3K site. There were no indications that the dump lines, water tank, or fittings were leaking, and the volume of the release is unknown. The tanks and associated lines were cleaned in preparation for decommissioning. A groundwater sample was collected and analyzed for benzene, toluene, ethylbenzene, and xylenes (BTEX). Laboratory analytical results, received on August 26, 2014, indicated benzene concentrations above the COGCC Table 910-1 standards, making this release reportable. Groundwater analytical results are presented on the attached table and laboratory analytical report.

<u>COA Type</u>	<u>Description</u>
	Based on review of information presented it appears that no further action is necessary at this time. However, should future conditions at the site indicate contaminant concentrations in soils exceeding COGCC standards or if ground water is found to be significantly impacted, further investigation and/or remediation activities may be required at the site.
